

## Drawer Boxes & Components

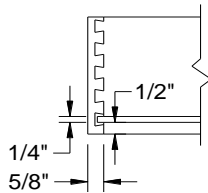

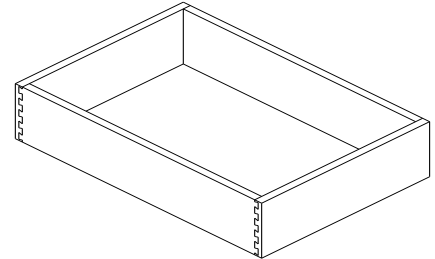

### Warranty Information

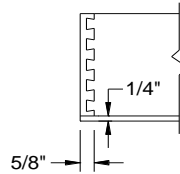

Bayer Interior Woods warrants its products to be manufactured and delivered free of defects. Tolerances have been built into our doors and wainscot panels to allow for natural movement of the wood. Products not sealed or coated in a reasonable amount of time will not be warranted, as well as products handled improperly by customers. The warranty does not cover installation, labor or travel time and is valid for one year from date of shipment. Door panels over the height of 40" (44" tall door) and width of 18" (22" wide door) are not covered by the warranty. Due to the natural photosensitive darkening process, we strongly recommend that you finish cherry products immediately upon receipt.
